8 point grid system : we use multiples of 8 to define dimension padding and margin of elements .

Vertical Rhythm : Vertical Rhythm is simply when a body of text is aligned to evenly spaced horizontal lines .

vertical scale : is the ability to move a service to machine that has more resource .

module grid : is a grid which has consistent horizontal divisions from top to bottom in addition to vertical division from left to right .

Atomic design : is a methodology composed of five distinct stages working together to create interface design systems in a more deliberate and hierarchical manner.

Responsive design : is an approach to web page creation that makes use of flexible layouts, flexible images and cascading style sheet media queries. The goal of responsive design is to build web pages that detect the visitor's screen size and orientation and change the layout accordingly.

UI : is the graphical layout of an application

UX : determined by how easy or difficult it is to use ui elements .
